

PA Product Features

As our Payment Automation Platform grows, the feature set and capabilities will expand as well. Below is a list of features we currently offer.

FEATURES	BENEFIT/VALUE ADD
Single Sign-on for Paymerang Products	Eliminates the need for multiple login credentials within the Paymerang product suite.
Multifactor Authentication via Soft Token	Enhances security, reduces unauthorized access risks, and protects valuable information.
Expanded Reporting Capabilities	Provides more transparency through self-service reporting.
Expanded User Permissions	Enables users to approve payments in bulk.
Attach Supporting Documentation	Supporting documentation can now be included with check payments.
Global Search Functionality	Saves time spent searching for payments.
Vendor Management Enhancement	Allows a user to speed up the batch process by pulling in vendors from the payment file and eliminates the need for manual entry.
