

# What Our Clients Are Saying

## How a Net Promoter Score (NPS) is Calculated.

NPS is a customer loyalty metric that measures customers' willingness to make another purchase and make a recommendation to their family, friends or colleagues.

A Net Promoter Score can range from -100 to +100 depending on how loyal and enthusiastic a company's customers are.

## How We Measure Up

## Award-Winning AP Automation

Paymerang has saved our Accounts Payable staff member hours upon hours, allowing them to focus on other more important duties.

Paymerang has amazing customer service. Implementation was easy and Paymerang follows up with you regularly until you are used to their system.

The time saved is amazing. It would take me too long to list all the features that are helpful - the program is THAT good.

I like that I can call Paymerang and actually talk to a person. I also get quick responses whether I call or email with a question or issue with a payment. Always very friendly service.
